The Logical Magic Of Change

A Brief History of Logical Levels by Robert B. Dilts. The notion of logical levels refers to the fact that some processes and phenomena are created by the relationships between other processes and phenomena. Any system of activity is a subsystem embedded inside of another system, which is embedded inside of another system, and so on.

You could do this with a normal pivot table by dragging Year into the columns area and then Sales into the values area. This is a great example of Excel's Internal Network Effect where your interest in Power Pivot has lead you to a feature that already existed in Excel apart from Power Pivot (I've experienced this many times).
