Background. On time performance is a measure of the ability of transport services to be on time. Almost all transportation systems have timetables, which describe when vehicles are to arrive at scheduled stops. Transport services have a higher utility where services run on time, as anyone planning on making use of the service can align their activities with that of the transport system.

385. Between 1985 and 1997, the modal share of public transport decreased from 34.3 percent to 19.7 percent. This represents a major shift away from public transport and in particular bus transport, which is partly attributable to higher personal affluence leading to an increase in car ownership and also to deficiencies in the bus services.
