The Higgs boson is an elementary particle in the Standard Model of particle physics, produced by the quantum excitation of the Higgs field, one of the fields in particle physics theory. It is named after physicist Peter Higgs, who in 1964, along with five other scientists, proposed the mechanism which suggested the existence of such a particle. Its existence was confirmed in 2012 by the ATLAS

In answer to the question why does the Universe exist, the traditional theistic answer is to simply state that God did it 1, 2. The belief that "everything must have a cause, therefore God exists" is called a First Cause argument. But that merely results in new questions: (1) why did god create the Universe? and (2) why does God exist? If it is valid to say "everything has a cause except God", it ...
