The nominal group technique (NGT) is a group process involving problem identification, solution generation, and decision making. It can be used in groups of many sizes, who want to make their decision quickly, as by a vote, but want everyone's opinions taken into account (as opposed to traditional voting, where only the largest group is considered). ...

Nominal group technique - Wikipedia

Doing a sorting activity is a constrained form of participation, but that doesn't diminish its ability to be useful. When I shared the story of the book drops with Daniel Spock, director of the Minnesota Historical Society's History Center (MHC), he was inspired to adapt their model to his institution.

The Ancestral Puebloan culture is known for the stone and earth dwellings its people built along cliff walls, particularly during the Pueblo II and Pueblo III eras, from about 900 to 1350 AD in total. The best-preserved examples of the stone dwellings are now protected within United States' national parks, such as Navajo National Monument, Chaco Culture National Historical Park, Mesa Verde ...

Puebloans - Wikipedia

The success of any project depends on the contributions of every member of the team, but some teams work together better than others. When team members have a sense of personal ownership in the group project, believe that their contributions are valued, and see that the project manager contributes equally and leads by example, they feel motivated to contribute their best work.

The Most Effective Techniques to Encourage Team Members to ...
