Medical availability and clinical practice varies across the world due to regional differences in culture and technology. Modern scientific medicine is highly developed in the Western world, while in developing countries such as parts of Africa or Asia, the population may rely more heavily on traditional medicine with limited evidence and efficacy and no required formal training for practitioners.

1. Introduction. The conceptualisation and formalisation of evidence-based medicine (EBM) in the late twentieth century was a significant impetus for change in health care, impacting not only clinical decision-making, but also health policy, education and research [1,2]. The premise of EBM (and that stemming from EBM, including evidence-based practice [EBP] and evidence-based care) was that ...
