In software engineering, a software development process is the process of dividing software development work into distinct phases to improve design, product management, and project management. It is also known as a software development life cycle. The methodology may include the pre-definition of specific deliverables and artifacts that are created and completed by a project team to develop or ...

Hi Jeremy, Thanks for the post. It is a great use for MPLS beginners like me. One small query. You had mentioned that an IGP needs to run at core( that is, between PE routers and P routers - OSPF mostly).This is needed for PE routers to believe that IGP connectivity is available and they can proceed with exchanging the prefixes.
