The Encyclopedia Of Early Earth

Earth is the planet we live on. It is the third planet from the Sun. It is the only planet known to have life on it. The Earth formed around 4.5 billion years ago. It is one of four rocky planets on the inside of the Solar System. The other three are Mercury, Venus and Mars. The large mass of the Sun makes Earth move around it, just as the mass of Earth makes the moon move around it.

The flat Earth model is an archaic conception of Earth's shape as a plane or disk. Many ancient cultures subscribed to a flat Earth cosmography, including Greece until the classical period, the Bronze Age and Iron Age civilizations of the Near East until the Hellenistic period, India until the Gupta period (early centuries AD), and China until the 17th century.

Flat Earth - Wikipedia

The history of Earth concerns the development of planet Earth from its formation to the present day. Nearly all branches of natural science have contributed to understanding of the main events of Earth's past, characterized by constant geological change and biological evolution. The geological time scale (GTS), as defined by international convention, depicts the large spans of time from the ...

History of Earth - Wikipedia

The geological history of Earth began 4.567 billion years ago, when the planets of the Solar System were formed out of the solar nebula, a disk-shaped mass of dust and gas left over from the formation of the Sun. Initially molten, the outer layer of the planet Earth cooled to form a solid crust when water began accumulating in the atmosphere. The Moon formed soon afterwards, possibly as the ...

Geological history of Earth - New World Encyclopedia

One of the few Christian symbols dating from the first century is that of the Good Shepherd carrying on His shoulders a lamb or a sheep, with two other sheep at his side. Between the first and the fourth century eighty-eight frescoes of this type were depicted in the Roman catacombs. The signification which may be attached to this symbol, according to Wilpert's interpretation, is as follows.

CATHOLIC ENCYCLOPEDIA: The Lamb (In Early Christian Symbolism)

An earthquake is the shaking of the surface of the Earth. Earthquakes can be extremely violent. They are caused by weird movements of the Earth's tectonic plates. The study of earthquakes is called seismology. Earthquakes are usually quite brief, but may repeat.

Enlil (EN = Lord+ LIL = Air, "Lord of the Wind") was the name of a major Mesopotamian deity. In early Sumerian inscriptions he is portrayed as the primary deity and king of the gods. Enlil was the god of the sky and the earth, the father of the Moon god Sin (Nanna), and the grandfather of the great goddess Ishtar (Inanna). His primary consort was the grain and fertility goddess Ninlil (Lady of
