Open source is a term denoting that a product includes permission to use its source code, design documents, or content. It most commonly refers to the open-source model, in which open-source software or other products are released under an open-source license as part of the open-source-software movement. Use of the term originated with software, but has expanded beyond the software sector to ...

Open-source hardware (OSH) consists of physical artifacts of technology designed and offered by the open-design movement. Both free and open-source software (FOSS) and open-source hardware are created by this open-source culture movement and apply a like concept to a variety of components. It is sometimes, thus, referred to as FOSH (free and open-source hardware).

We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value: Individuals and interactions over processes and tools Working software over comprehensive documentation Customer collaboration over contract negotiation Responding to change over following a plan. That is, while there is value in the items on

The GNU Manifesto. The GNU Manifesto (which appears below) was written by Richard Stallman in 1985 to ask for support in developing the GNU operating system. Part of the text was taken from the original announcement of 1983. Through 1987, it was updated in minor ways to account for developments; since then, it seems best to leave it unchanged.

Shortly after publishing the manifesto online, we were approached by David Miller of the Garamond Agency, who saw a potential book in our ideas. Duh, we said, a book? But he convinced us. The day that word of the manifesto hit The Wall Street Journal, he rang up all the major U.S. publishers and started an auction. The hands-down winner was Perseus Books.
