The Evolution Of Human Intellect

Human intelligence is the intellectual power of humans, which is marked by complex cognitive feats and high levels of motivation and self-awareness. Intelligence enables humans to remember descriptions of things and use those descriptions in future behaviors.

Intelligence - Wikipedia

This report covers the first phase of a program aimed at developing means to augment the human intellect. These "means" can include many things—all of which appear to be but extensions of means developed and used in the past to help man apply his native sensory, mental, and motor capabilities—and we consider the whole system of a human and his augmentation means as a proper field of search ...

Play the game as a single cell organism, and upgrade your biology, intellect, and technology to evolve a civilization on the brink of technological singularity.

Cell to Singularity - Evolution Never Ends - Play game

A superintelligence is a hypothetical agent that possesses intelligence far surpassing that of the brightest and most gifted human minds. "Superintelligence" may also refer to a property of problem-solving systems (e.g., superintelligent language translators or engineering assistants) whether or not these high-level intellectual competencies are embodied in agents that act in the world.

Superintelligence - Wikipedia

About the game : The world's computer capacity, connectivity and intelligence have breached the technological singularity: a collective intellect exists beyond the human mind, replicating and improving itself.

In some circles, however, opposition to the concept of evolution has persisted to the present. The argument from design has recently been revived by a number of academics with scientific credentials, who maintain that their version of the idea (unlike Paley's) is soundly supported by both microbiology and mathematics.
