### **The Life Of Birds David**

The Life of Birds is a BBC nature documentary series written and presented by David Attenborough, first transmitted in the United Kingdom from 21 October 1998.. A study of the evolution and habits of birds, it was the third of Attenborough's specialised surveys following his major trilogy that began with Life on Earth. Each of the ten 50-minute episodes discusses how the huge variety of birds ...

The Cuckoo The cuckoo is the common name for a family of birds (scientific name Cuculidae) that has about 60 members. There is a large variety. While most are dove-sized, they can range in size from 6.5 to 36 inches; and while the most common are blue gray and brown, some are iridescent blue and emerald green.

This seagull (like all the rest of us) is powered by solar energy. It's food is a form of stored solar energy. For a seagull, the energy could come originally from phytoplankton (see energy pyramids) that was eaten by a fish that died and was eaten by a crab that was then eaten by the seagull. Or the energy could have come originally from grass that was eaten by a cow that was made into a ...

A graceful, slender-tailed, small-headed dove that's common across the continent. Mourning Doves perch on telephone wires and forage for seeds on the ground; their flight is fast and bullet straight. Their soft, drawn-out calls sound like laments. When taking off, their wings make a sharp whistling or whinnying. Mourning Doves are the most frequently hunted species in North America.

North America's littlest falcon, the American Kestrel packs a predator's fierce intensity into its small

body. It's one of the most colorful of all raptors: the male's slate-blue head and wings contrast elegantly with his rusty-red back and tail; the female has the same warm reddish on her wings, back, and tail. Hunting for insects and other small prey in open territory, kestrels perch ...
