A coral reef is an underwater ecosystem characterized by reef-building corals. Reefs are formed of colonies of coral polyps held together by calcium carbonate. Most coral reefs are built from stony corals, whose polyps cluster in groups. Coral belongs to the class Anthozoa in the animal phylum Cnidaria, which includes sea anemones and jellyfish. Unlike sea anemones, corals secrete hard carbonate ...

Definition. The term problem solving means slightly different things depending on the discipline. For instance, it is a mental process in psychology and a computerized process in computer science. There are two different types of problems, ill-defined and well-defined: different approaches are used for each.

Definition. The following definitions of motivation were gleaned from a variety of psychology textbooks and reflect the general consensus that motivation is an internal state or condition (sometimes described as a need, desire, or want) that serves to activate or energize behavior and give it direction (see Kleinginna and Kleinginna, 1981a).. internal state or condition that activates behavior ...

The Constructive Aspect of Visual Perception - CNS Classes

The article illustrates an approach to automated acceptance testing in developing software with Java. Acceptance tests directly tie into software requirements specification and the key for achieving maintainable tests is proper handling of traceability between the requirements and implementation as well as between the requirements and acceptance tests.

Automated Acceptance Tests and Requirements Traceability

The process flow diagram (PFD) represents a quantum step up from the BFD in terms of the amount of information that it contains. The PFD contains the bulk of the chemical engineering data necessary for the design of a chemical process. For all of the diagrams discussed in this chapter, there are no ...

A variety of practices have been developed and implemented in organizations for reasons other than leadership development. Most typically, these practices were primarily intended to improve performance management (e.g., 360-degree feedback), facilitate corporate socialization (e.g., mentoring), or enhance productivity (e.g., job assignments, action learning).
