Heat Transfer with Hot Coffee. by Ron Kurtus (revised 9 November 2014) A good application of heat transfer can be seen when you buy a cup of hot coffee at your favorite coffee shop.. The hot coffee heats the paper cup by conduction. The cup provides little insulation, so many coffee shops provide a cardboard insulator to protect your fingers from getting burned.

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.
