Flux describes any effect that appears to pass or travel (whether it actually moves or not) through a surface or substance. A flux is either a concept based in physics or used with applied mathematics. Both concepts have mathematical rigor, enabling comparison of the underlying mathematics when the terminology is unclear.

The Grashof number (Gr) is a dimensionless number in fluid dynamics and heat transfer which approximates the ratio of the buoyancy to viscous force acting on a fluid. It frequently arises in the study of situations involving natural convection and is analogous to the Reynolds number. It's believed to be named after Franz Grashof. Though this grouping of terms had already been in use, it wasn't ...

Restaurants & catering While public eateries existed in Ancient Rome and Sung Dynasty China, restaurants (we know them today), are generally credited to 18th century France. The genesis is quite interesting and not at all what most people expect. Did you know the word restaurant is derived from the French word restaurer which means to restore? The first French restaurants [pre-revolution] were ...

Wow it is almost a year since we did our last blog. Must be time to fill you all in on what is been going on in our lives. Where to start! Tui worked right through last Christmas, night shift, and as we

were parked in our Mates, George & Vicki's yard, we joined them in their Christmas celebrations.

Welcome to my page of quotations about age, aging, and youth. Even though I've been collecting these since I was thirteen, I must admit that this page has grown quite a bit since my late thirties and early forties, when the subject suddenly became a lot more personal to me. If you are looking for ...
