The Specimen Pete Kahle

Jun 13, 2014 rated it really liked it. The Specimen by Pete Kahle is an all around awesome science fiction/horror novel and some chapters really got my adrenaline pumping! Pete does a great job at creating a parasitic alien species known as "Riders" which are more complex than they seem at first.

The Specimen by Pete Kahle - Goodreads

Tonight, I finished The Specimen, by Pete Kahle. It is the first novel in a series that follows a huge cast of characters, sometimes over centuries, as they battle with an alien force bent on destruction and human enslavement. The novel might remind you a little of Invasion of the Body Snatchers, but it is so much more.

Review: "The Specimen," Pete Kahle - Errant Dreams

For a first time novelist, Pete Kahle certainly does not lack for ambition. He boldly goes right for the jugular in constructing a millennia-spanning tale of creatures of an unknown origin who have been saddling themselves to human hosts and influencing their behaviour for what purpose remains unknown.
