Nucleosynthesis is the process that creates new atomic nuclei from pre-existing nucleons, primarily protons and neutrons. The first nuclei were formed about three minutes after the Big Bang, through the process called Big Bang nucleosynthesis. Seventeen minutes later the universe had cooled to a point at which these processes ended, so only the fastest and simplest reactions occurred, leaving ...

Nucleosynthesis - Wikipedia

Simple living encompasses a number of different voluntary practices to simplify one's lifestyle. These may include, for example, reducing one's possessions, generally referred to as minimalism, or increasing self-sufficiency. Simple living may be characterized by individuals being satisfied with what they have rather than want. Although asceticism generally promotes living simply and refraining ...
