The Origin of Species by Charles Darwin - Read Print

No conversation about evolution is complete without a discussion of British naturalist Charles Darwin and his biological studies touchstone, *On the Origin of Species*, which introduced evolution to the general public. Darwin, whose Feb. 12 birthday is celebrated annually as Darwin Day, came from a family of doctors and was expected to follow in their path.

Charles Darwin and On the Origin of Species - Science NetLinks

Charles Robert Darwin was an English naturalist, eminent as a collector and geologist, who proposed and provided scientific evidence that all species of life have evolved over time from common ancestors through the process he called natural selection.

Darwin Online: Darwin's Publications

This article covers the time period from November 1859 to April 1861. The immediate reactions to *On the Origin of Species*, the book in which Charles Darwin described evolution by natural selection, included international debate, though the heat of controversy was less than that over earlier works such as *Vestiges of Creation*. Darwin monitored the debate closely, cheering on Thomas Henry Huxley ...

Reactions to On the Origin of Species - Wikipedia

This film explores the epic voyages of Darwin and Wallace that led each to independently propose the natural origin of species and formulate the theory of evolution by natural selection. Up until the early 1800s, most people, scientists included, believed that every species was specially created by ...

PRIMARY SOURCE Darwin Origin of Species - Rob MacDougall

Darwin and Natural Selection. Most educated people in Europe and the Americas during the 19th century had their first full exposure to the concept of evolution through the writings of Charles Darwin. Clearly, he did not invent the idea. That happened long before he was born. However, he carried out the necessary research to conclusively document that evolution has occurred and then made the ...

Early Theories of Evolution: Darwin and Natural Selection

The Origin is a biographical novel of the life of Charles Darwin written by Irving Stone. Darwin was a geologist and biologist, and could be considered the father of evolutionary theory. The novel begins with Darwin at the age of 22 and follows him through the Voyage of the Beagle until his death in 1882.. Stone took five years to research and write the novel and consulted numerous Darwin ...
