Middle school students are often afraid of being perceived as stupid when trying to solve problems in class. When they see adults, in this case their teachers, go through the same struggles, they are more willing in the future to test and share their ideas.

ScienceFix - Science Fix

A New Kind of Science is a best-selling, controversial book by Stephen Wolfram, published by his own company in 2002. It contains an empirical and systematic study of computational systems such as cellular automata. Wolfram calls these systems simple programs and argues that the scientific philosophy and methods appropriate for the study of simple programs are relevant to other fields of science.
