Herbalism (also herbal medicine) is the study of botany and use of plants intended for medicinal purposes. Plants have been the basis for medical treatments through much of human history, and such traditional medicine is still widely practiced today. Modern medicine makes use of many plant-derived compounds as the basis for evidence-based pharmaceutical drugs.

Recently on our website I wrote an article explaining how doctors and scientists the world over are increasingly concerned about the evolution of antibiotic-resistant bacteria. I would now like to expand on the use of herbs as antibiotics and immune-stimulating allies. The story so far:

Natural Alternatives to Antibiotics | The Happy Herb Company

Common Name. Standardized: oat Other: oatstraw. Botanical Name. Avena sativa L. Plant Family: Poaceae Overview. A. sativa, or the common oat, is a popular cereal grain that has been eaten for at least 3,000 years. Although this is one of the main uses for this plant, various parts of the plant, such as the young seed and the oatstraw, are nutritive and have nervine qualities, and are thus a ...
