Texts at the independent level are those the student can read alone (and are therefore in the ZAD). Texts at the instructional level are those that students can read with help, and through which students will learn new content and new procedures of reading (because the demands of reading that book lie in the ZPD - they can be learned with the appropriate assistance).

In baseball, the strike zone is the volume of space through which a pitch must pass in order to be called a strike, if the batter does not swing. The strike zone is defined as the volume of space above home plate and between the batter's knees and the midpoint of their torso. Whether a pitch passes through the zone is decided by an umpire, who is generally positioned behind the catcher.

Dewey's cycles work. Dewey first became interested in cycles while Chief Economic Analyst of the Department of Commerce in 1930 or 1931 because President Hoover wanted to know the cause of the Great Depression. Dewey reported that each economist to whom he spoke gave him a different answer and he lost faith in the current economic methods.
