Exsanguination is the loss of blood to a degree sufficient to cause death. One does not have to lose all of one's blood to cause death. Depending upon the age, health, and fitness level of the individual, people can die from losing half to two-thirds of their blood; a loss of roughly one-third of the blood volume is considered very serious.

In this issue of 580 Split, we invited writing and visual art that reflects on the breaches of our current political climate, the ways these breaches have scarred and marked us, and moments that break through the surface of the status quo to create something new. Though these are dangerous times for the vulnerable and marginalized among us, we were interested in writing that explores the ...

In American English the pronoun you has been supplemented by additional forms to make clear the distinction between singular and plural. You-all, often pronounced as one syllable, is a widespread spoken form in the South Midland and Southern United States. Its possessive is often you-all's rather than your. You-uns (from you + ones) is a South Midland form most often found in uneducated speech ...
