Firm data on fear levels only go back so far, so it's hard to isolate a turning point. Gallup polls on fear of terrorism only date to about the time of the Oklahoma City Bombing in 1995.

Fear in America: Why We're More Afraid Than Before | Time

Overview. State of Fear is, like many of Crichton's books, a fictional work that uses a mix of speculation and real world data, plus technological innovations as fundamental storyline devices. The debate over global warming serves as the backdrop for the book. Crichton supplies a personal afterword and two appendices that link the fictional part of the book with real examples of his thesis.
