Group theory. The commutator of two elements, g and h, of a group G, is the element [g, h] = g −1 h −1 ghand is equal to the group's identity if and only if g and h commute (that is, if and only if gh = hg).The set of all commutators of a group is not in general closed under the group operation, but the subgroup of G generated by all commutators is closed and is called the derived group or ...

In linear algebra, a nilpotent matrix is a square matrix N such that = for some positive integer.The smallest such is sometimes called the index of .. More generally, a nilpotent transformation is a linear transformation of a vector space such that = for some positive integer (and thus, = for all ≥). Both of these concepts are special cases of a more general concept of nilpotence that ...

The "15 puzzle" is a sliding square puzzle commonly (but incorrectly) attributed to Sam Loyd. However, research by Slocum and Sonneveld (2006) has revealed that Sam Loyd did not invent the 15 puzzle and had nothing to do with promoting or popularizing it. The puzzle craze that was created by the 15 puzzle began in January 1880 in the United States and in April in Europe and ended by July 1880.

代数学（だいすうがく、algebra）は数学の一分野で、「代数」の名の通り数の代わりに文字を用いて方程式の解法を研究する学問として始まった。しかし19世紀以降の現代数学においては、ヒルベルトの公理主義やブルバキスタイルに見られるように、代数学はその範囲を大きく広げているため ...
