Three Scenarios In Which Hana
A Strange Object is an independent press based in Austin, Texas, dedicated to publishing surprising, heartbreaking fiction alongside thoughtful ephemera. We're talking about fiction that haunts and inspires us—big work that engulfs, that takes risks, that bucks form, that builds warm dwellings in dark places.

A Strange Object
HANA was created to solve a problem for SAP not for customers. SAP wanted to remove IBM and Oracle from BW accounts. Thousands of BW customers used HANA with BW between 2010 and 2015.

Great news about HANA! - post regarding SAP layoffs
SAP HANA create a memory pool for managing and tracking the consumption of memory. The memory pool is used to store all the in-memory data and system tables, thread stack, temporary computations and all other data structure required for managing the database.
