Definition. The term problem solving means slightly different things depending on the discipline. For instance, it is a mental process in psychology and a computerized process in computer science.There are two different types of problems, ill-defined and well-defined: different approaches are used for each.

Problem solving - Wikipedia

The self is an individual person as the object of his or her own reflective consciousness. This reference is necessarily subjective, thus self is a reference by a subject to the same subject. The sense of having a self—or self-hood—should, however, not be confused with subjectivity itself. Ostensibly, there is a directness outward from the subject that refers inward, back to its 'self' (or ...

The seeds of public education's current failures are found in its success in the past. From its inception, public education has been called on to transmit core knowledge and cultural values, provide custodial care, and prepare students for life after school, the most important aspect of which is critical and creative thinking for problem solving and decision making.
