Rule 1: Non-zero digits are always significant. Hopefully, this rule seems rather obvious. If you measure something and the device you use (ruler, thermometer, triple-beam balance, etc.) returns a number to you, then you have made a measurement decision and that ACT of measuring gives significance to that particular numeral (or digit) in the overall value you obtain.

This resource links to Year 4, Spring, block 1(week 3) small step 'Divide 2-digits by 1-digit (2)' The contents include differentiated worksheets (and answers) that follow the concrete, pictorial and abstract method for maths mastery. They also include reasoning and problem-solving.

Year 4 - Spring block 1 - Divide 2-digits by 1-digit (2 ...

A character class including a dot matches a literal dot, not any character. The real problem is, that the OP did not force digits to immediately follow after the beginning, i.e. no ^, also he does not allow for multiple digits before the decimal point.[.] was perfectly fine. – phant0m Nov 3 '12 at 10:58 | show 9 more comments

Regular expression to enforce 2 digits after decimal point
