Econometrics and Time Series Analysis, SAS/ETS Software

Formal definition. In econometrics, as in statistics in general, it is presupposed that the quantities being analyzed can be treated as random variables.An econometric model then is a set of joint probability distributions to which the true joint probability distribution of the variables under study is supposed to belong. In the case in which the elements of this set can be indexed by a finite ...

STAMP. STAMP is a statistical / econometric software system for time series models with unobserbed components such as trend, seasonal, cycle and irregular.

STAMP
Trend analysis is the widespread practice of collecting information and attempting to spot a pattern. In some fields of study, the term "trend analysis" has more formally defined meanings. Although trend analysis is often used to predict future events, it could be used to estimate uncertain events in the past, such as how many ancient kings probably ruled between two dates, based on data such ...
